

MicroOne

Single use microfiber wipe

Single use. Multi advantages.

When top hygiene is paramount, nothing beats microfiber. MicroOne has the DNA from Vileda Professional's top-class and respected hygiene cleaning products, which have helped creating hygienic environments for many years.

MicroOne is the best-in-class choice when you need a top hygiene cleaning result, and consider single-use products as the best option for your site.

The hygiene hero

MicroOne has a proven performance of 99.9% bacteria reduction, and is compliant to chlorine-based disinfectant. In Health Care settings single-use products help reducing cross contamination, if laundry logistics is not in place.

Easy and hygienic handling

MicroOne comes packed in handy plastic bags, for hygienic transportation and handling. Each wipe is Z-folded for easy removal even when wearing gloves. The bag fits perfectly in a 6-litre bucket and is easily re-sealed using the packaging label, for maximum hygiene.

MicroOne concept is fully designed for the pre-prepared method, but is as well suitable for the bucket or spray method.

Easy and effective pre-preparation

Pre-preparation is the method for reliable hygienic and ergonomic wiping. And the pre-preparation process is carried out fast and effectively.

Simply:

- Place bag with 50 wipes in bucket
- Open the package and pour 500 mL (for cleaning) or 600 mL (for disinfection) of solution over the stack of wipes.
- After 15 minutes the liquid is evenly distributed within the stack of MicroOne wipes which are now ready to use

The clever plastic bag-in-bucket concept prevents that the bucket gets in touch with the moist wipes. No residues and soiling in the bucket mean no bacterial growth on the bucket inner surface.

The lid of the bucket is easy to open and to close with one hand and prevents drying-out of wipes effectively.

Top cleaning performance

MicroOne shows not only best-in-class hygienic cleaning performance, it of course also delivers streak free results and a high water absorbance.

Thanks to the 100% microfiber composition, the cleaning performance is excellent even in difficult cleaning situations like fatty stains or finger prints.

See for yourself!
